Assistant Researcher at CONICET at the Housing and Habitat Research Institute of the Faculty of Architecture, Urbanism and Design and professor and extension worker at the Faculty of Social Sciences at the National University of Córdoba, Argentina; and Maria Florencia Sosa, Doctoral Scholar at CONICET - Housing and Habitat Research Institute (FAUD-UNC), PhD student in Architecture FAUD-UNC, Argentina.

This article “New territories in public housing program environments. Informal settlement Parque Ituzaingó annex II in Córdoba, Argentina” aims to demonstrate that the mercantilist logic in urban development and the intensification of social inequalities are central aspects of the current century. Public housing policy is no exception to this logic, with its location increasingly distant and the increase in informal settlements. The article exposes the way in which, without pretension, conditions were created for the production of new informal peripheral territories that were configured from its materialization and reflect on the right to the city in this context. Methodologically, to analyze the processes and spatial transformations resulting from the location, a qualitative and quantitative approach was developed for the housing program *Mi Casa Mi Vida* in the city of Córdoba.

Subsequently, a case study was carried out, with a survey taken on a settlement, seeking to understand, in a micro perspective, the living and living conditions of the residents. The results give an account of the form of production in the peripheral informal territories and provide reflections on the relations of physical and social proximity in situations of informality, on the forms of access to land and housing, articulating the production of the settlement and political housing.

As in the numbers previously published, in the current volume 13, number 01, we published 16 (sixteen) unpublished articles, being 04 articles by foreign professors: the aforementioned "New territories in public housing program environments. Informal settlement Parque Ituzaingó annex II in Córdoba, Argentina" by Maria Cecilia Marengo, Ph.D, Technological University of Delft - Netherlands. Architect, Master in Architectural and Urban Design, FAUD - National University of Córdoba, Argentina. Independent Researcher, CONICET at the Housing and Habitat Research Institute, FAUD, Gv. the HDI – UNC / CONICET; by Maria Virginia Monayar, PhD in Social Sciences with a specialization in geography. Assistant Researcher at CONICET- Housing and Habitat Research Institute (FAUD-UNC), professor at the Faculty of Social Sciences at the National University of Córdoba, Argentina; by Ana Laura Elorza, PhD in Social Sciences (UNCuyo), Master in Management and Housing Development, graduated in Social Work. Assistant Researcher at CONICET at the Housing and Habitat Research Institute of the Faculty of Architecture, Urbanism and Design and professor and extension worker at the Faculty of Social Sciences at the National University of Córdoba, Argentina; and Maria Florencia Sosa, Doctoral Scholar at CONICET - Housing and Habitat Research Institute (FAUD-UNC), PhD student in Architecture FAUD-UNC, Argentina; "' May not this change reduced to brick'.
